UNIT – IV
(GRAMMAR AND VOCABULARY)

(10)

I.) Read the passage given below.

Cardamom, the queen of all spices, has a history as old as the human race. It is the dried fruit of a herbaceous perennial plant. Warm humid climate, loamy soil rich in organic matter, distributed rainfall and special cultivation and processing methods all combine to make Indian cardamom truly unique in aroma, flavour, size and it has a parrot green colour. Two types of cardamom are produced in India. The first type is the large one, which has not much significance as it is not traded in the future market. It is cultivated in north-eastern area of the country. The second type is produced in the southern states and these are traded in the future market. These are mainly cultivated in Kerala, Tamilnadu and Karnataka. As per the future market rules, only 7 mm quality was previously traded in exchanges. But later, it relaxed its norms and now 6 mm quality is also traded in the exchanges. Cardamom is an expensive spice, secondly to saffron. Indian cardamom is known in two main varieties : Malabar cardamom and Mysore cardamom. The Mysore variety contains leaves of cineol, limonene and hence is more aromatic. India is the world's largest producer and exporter emerged as the leading producer and exporter of cardamom. The main harvest season of cardamom in India is between August-February. Cardamom reaches at yielding stage two years after the plantation. The primary physical markets of cardamom are Kumily Vandemodu, Jhekkady, Puliarmala in Kerala and Bodynaikkaur and Cumbum in Tamilnadu. Kerala is the main producer of cardamom and contributes upto 60% in total production. Karnataka produces around 25% of the total production cardamom. Ooty is the main producer of cardamom in Tamilnadu and contributes around 10-15% of the total production. Besides India, Guatemala also produces around 1,000-2,000 ton cardamom per year. Due to low quality of cardamom from Guatemala, it remains available at cheaper rates.

10

Le français est la deuxième langue étrangère en Inde, après l'anglais. Parce que c'est une langue facile à apprendre et une culture intéressante à connaître, le français est très populaire parmi les autres langues étrangères comme le russe et l'allemand. Dans le milieu international, le français est une des langues officielles des Nations Unies (l'ONU).

L'Inde a une population non négligeable de francophones. Dans les régions comme Pondichéry, Yanam, Karaikal, Chandannagore et Mahé, le français était toujours la première langue. Ces régions sont des anciens territoires français en Inde. Dans leurs territoires, les Français ont encouragé le français comme langue de travail. Même aujourd'hui, à l'école d'Auroville à Pondichéry, le français est la langue d'instruction. La propagation et l'enseignement du français en Inde sont la responsabilité de l'Alliance française et du Centre Culturel de l'Ambassade de France. Il y a aussi plusieurs instituts et universités, où le français est sujet principal. Ils offrent des cours à temps partiel et à plein temps.

L'Université de Delhi à Delhi, l'Université Jawaharlal Nehru, situé à Delhi, l'Université de Poona à Poona et Central Institute of English and Foreign Languages (CIEFL) à Hyderabad sont quelques instituts qui offrent des programmes de licence (BA) en français en plein temps. Pour obtenir une admission à ces instituts, il faut terminer les 12 ans d'études à l'école (10+2). Ces programmes donnent à un étudiant la possibilité de suivre une carrière de "professionnel de langue". Pour des étudiants moins sérieux, ils ont l'option d'un cours à l'Alliance française.

En Inde, il y a toutes sortes de personnes qui apprennent le français—les étudiants, les cadres, les officiers du gouvernement, les couturiers, etc. Enfin, le français, c'est « à la mode ! »
