Correct the errors in the following sentences

(1x5=5)

- 1. A hundred dollars are a big sum.
- 2. I will be at your house by an hour.
- 3. It was very kind for you to invite me.
- 4. I wish my legs will stop aching.
- 5. I will invite you unless you apologize.

4) Read the following passage and answer the questions given below

5 Marks He was a funny-looking man with a high, bald, dome-shaped head, a face very small in comparison, a round upturned nose and a long wavy beard that didn't seem to belong to such a face. His ugliness was a standing joke among his friends and he helped them to enjoy the joke. He was a poor man and something of an idler, a stone- cutter by trade, a sort of semi -skilled sculptor. But he didn't work any more than was necessary to keep his family alive. He preferred to talk and since his wife was a complaining woman who used her tongue like an angry wagon driver using a horse-whip, he loved above all things to be away from home.

He would leave home after a hasty breakfast and be in search of a shop, or a temple, or the public baths, or a street corner, where he could get into an argument. The city he lived in, was Athens and the man we are talking about is Socrates.

One of his friends had asked the oracle at Delphi, who was the wisest man in Athens. To the astonishment of all, the priestess had mentioned this idler Socrates.

"The Oracle", he said, "chose me as the wisest Athenian because I am the only one who knows that he doesn't know anything".

- A person who avoids work _____(choose a right word from the passage). (1)
- (2) 2. Why did Socrates stay away from home?
- (2) 3. How did Socrates spend his time?
- 5) Imagine you are the HR Manager of a firm. You have visited a college for campus interview. Give a brief self- introduction on this occasion and explain (5 Marks) the recruitment process.
- 6) Give one word substitutes for the following. Choose the appropriate answers from words given in brackets. (1x5=5)
- 1. To laugh quietly
- A state of total confusion.
- 3. Sudden convulsive movement.
- Something impossible to believe.
- Think about something deeply at length. (incredible, mull, chuckle, chaos, bristling, pulsating, spasm, tumble)

 - 1. A moment, Mr. Worthing. A hundred and thirty thousand pounds! And in the Funds! Miss Cardew seems to me a most attractive young lady, now that I look at her. Few girls of the present day have any really solid qualities, any of the qualities that last, and improve with time.
 - 2. I do not deny that is a serious blow. But after all, who has the right to cast a stone against one who has suffered? Cannot repentance wipe out an act of folly? Why should there be one law for men, and another for women?
 - 3. I'm not a Bunburyost at all. If Gwendolen accepts me, I am going to kill my brother, indeed I think I'll kill him any case. Cecily is a little too much interested in him. It is rather a bore so I am going to get rid of Ernest. And I strongly advise you to do the same with Mr. ___ with your invalid friend who has the absured name.
 - C Sketch the character of any TWO of the following in about 200-250 words: (2x5=10)
 - Gwendolen Fairfax
 - 2. Miss Prism and Dr Chasuble
 - 3. Jack Worthing
 - D Answer any ONE of the following questions in about 300-400 words:
 - 1. In the play 'The Importance of Being Earnest' Victorian values are perpetuated (1x10=10)through courtship and marriage. Elaborate.
 - 2. "The Importance of Being Earnest" is the best example for 'comedy of Manners. Explain.

UNIT - IV

IV A Read the following comprehension passage and answer the questions

Though much is said about the need to encourage grass roots innovators, the reality is that there are too many hurdles in their path. No one knows this better than Mangal Singh an innovator from Lalitpur District (Bundelkhand Region) of Uttar Pradesh. It was around 1987 that Mangal Singh successfully demonstrated the Mangal Turbine in his native Bhailoni Lodh village. The turbine lifts water from a river without using either diesel or electricity. Senior officials technocrats and researchers showered well deserved praise on the G 140.2

A study by IIT Delhi and Vigyan Shiksha Kendra found it very useful and cost effective, helpful not only in agriculture but also for small-scale industries. Later other scholars affirmed impressive reduction in greenhouse gas emissions achieved by the Mangal Turbine. Despite obtaining a patent and a bagful of endorsements at a relatively early age, Mangal Singh and his innovation have been victims of apathy and neglect over the last three decades. Although he has worked to spread the word about his innovation, visiting several states, age and discouragement have taken a toll on his health. The government should take immediate steps to give the Mangal Turbine importance in programmes relating to irrigation drinking water and renewable energy. Several lift irrigation projects in the country are non-functional today for a number of reasons. The Mangal Turbine can be used at suitable sites to give a new lease of life to these projects.

- 1. What did Mangal Singh innovate and where?
- 2. How does Mangal Singh's innovation work?
- 3. Name the institutions that lauded Mangal Singh's innovation.
- 4. What has Mangal Singh faced over the last three decades?
- 5. What does the government need to do regarding Mangal Singh's innovation?
- B The bar chart below shows the number of men and women working in the banking sector in New York city. Summarise the information in the chart by selecting and reporting the main features. Make comparisons (5) where relevant.

À Visan, les touristes vont à la ferme

Pas un villageois n'y échappe « La Ferme » de TF1, est aujourd'hui le principal sujet de discussion à Visan (Vaucluse), du salon de coiffure à la boulangerie. C'est dans ce village de 1638 habitants que sont implantés les locaux de la nouvelle émission de téléréalité. Une vingtaine de célébrités sont enfermées dans une ferme pour y travailler.

Au village, il y a les pours et les contres. Mais les enthousiastes sont plus nombreux. Au café le patron allume la télé à l'heure de l'émission : « Les clients la regarde, chacun y va de son commentaire. Souvent les passants nous demande ou est située la ferme. » Des passant parfois envahissants : 400 voitures ont débarqué le lundi de Pâques.

« Je n'avais jamais vu autant de monde à Visan » confie Claude, agriculteur.

Certains bénéficient déjà de retombées économiques, comme Géraldine, la boulangère : « On fournit de 30 à 80 baguettes par jours à la production, c'est rentable » Theo, de la cave de Visan, livre à la ferme entre 50 et 60 bouteilles tous les dix jours : « Nous sommes dans une région viticole. Si seulement 10% des téléspectateurs retiennent que les célébrités boivent du vin de chez nous, on aura réussi.»

D'autres sont plus critiques. Raphael, aide-soignant, espérait « que 'La Ferme' donnerait une meilleure image de Visan. Mais les journalistes nous snobent et nous étiquettent 'paysans'. Vivement que tout soit fini, que le village redevienne ce qu'il était. » Il ne reste donc plus qu'à attendre. Attendre de retrouver la tranquillité pour certains, attendre les retombées financière pour d'autres.

One important change that has affected family life in India, as the break up of the joint family system. In the new family pattern, both parents work and go their way and children go their own way. Working parents Often have very little time to spend as a family and the adolescents pulsating with new energy and full of new experiences and questions, begin to get estranged from their part time parents. They then turn to peers and media for their role models. We see the power of peers and media increase as the family influences decrease.

SECTION - B (Reading Comprehension)

II. A) Read following passage and answer the questions: (10x1=10)

The e-waste (Management and Handling) Rules, 2011, notified by the Ministry of Environment and forests have the potential to turn a growing problem into a developmental opportunity. With almost half-a-year to go before the rules take effect, there is enough time to create the necessary infrastructure for collection, dismantling and recycling of electronic waste. The focus must be on sincere and efficient implementation. Only decisive action can reduce the pollution and health costs associated with India's hazardous waste recycling industry. If India can achieve a transformation, it will be creating a whole new employment sector that provides good wages and working conditions for tens of thousands.

The legacy response of the states to even the basic law on urban waste, the Municipal solid wastes (Management and handling) rules, has been one of indifference, many cities continue to simply burn the garbage or dump it in lakes. With the emphasis now on segregation of waste at source and recovery of materials, it should be feasible to implement both sets of rules efficiently; A welcome feature of the new e-waste rules is the emphasis on extended producer responsibility.

In other words, producers must take responsibility for the disposal of end-of life products. For this provision to work, they must ensure that consumers who sell scrap get some form of financial incentive.

The e-waste rules, which derive from those pertaining to hazardous waste, are scheduled to come into force on 1st May, 2012. Sound as they are, the task of scientifically disposing a few hundred thousand tonnes of trash electronics annually depends heavily on a system of oversight by State Pollution Control Boards (PCBs). Unfortunately, most PCBs remain unaccountable and often lack the resource for active enforcement.

It must be pointed out that, although agencies handling e-waste must obtain environmental clearances and be authorized and registered by the PCBs even under the Hazardous Wastes (Management, Handling and Transboundary Movement) Rules, 2008, there has been little practical impact. Over 95% of electronic waste is collected and recycled by the informal sector. The way forward is for the, PCBs to be made accountable for enforcement of the e-waste rules and the levy of penalties under environmental laws. Clearly, the first order priority is to create a system that will absorb the 80000-strong workforce in the informal sector into the proposed scheme for scientific recycling. Facilities must be created to upgrade the skills of these workers through training and their occupational health must be ensured.

Recycling of e-waste is one of the biggest challenges today. In such a time, when globalization and information technology are growing at a pace which could only be imagined few years back, e-waste and its hazards have become more prominent over a period of time and should be given immediate attention.

B) Read following passage and answer the questions: (10x1=10)

"Organized retail has fuelled new growth categories-like liquid hand wash, breakfast cereals and pet food in the consumer goods industry, accounting for almost 50% of their sales", said data from market search firm Nielsen. The figures showed some of these new categories got more than 40% of their business from modern retail outlets. The data also suggests how products in these categories reach the neighbourhood kirana stores after they have established themselves in modern trade.

While grocers continue to be an important channel, for the new and evolving categories we saw an increased presence of high-end products in modern trade. E.g., premium products in laundry detergents, dishwashing, car air fresheners and surface care increased in availability through this format as these products are aimed at affluent consumers who are more likely to shop in supermarket/hypermarket outlets and who are willing to pay more for specialized products.

Some other categories that have grown exceptionally and now account for bulk of the sales from modern retail are frozen and ready-to-eat foods, pet food, diapers, pre-and post-wash products, hair conditioners and high-end shaving products, besides others. "Win the evolution of modern trade, our growth in this channel has been healthy as it is for several other categories. Modern retail in an important pare of our business" said managing director, Kellogg India.

Contd....6

What modern retail offers to companies experimenting with new categories the chance to educate customers which was not the case with a general trace store. "Category creation and market development starts with modern trade b as more consumers start consuming this category, they penetrate into other channels, said President, food & FMCG category, future group the country largest retailer which operates stores like Big Bazaar.

But a point to note here is that modern retailers themselves push their ow private brands in these very categories and can emerge as a big treat for th consumers goods and foods companies. For instance, Big Bazaar's private labe clean mate is hugely popular and sells more than a brand like Harpic in its own stores. "So, there is a certain amount of conflict and competition that will play out over the next few years which the FMCG companies will have to watch ou for", KPMG's executive director (retail) said.

B) Write a precis on the following passage reducing to its one third of its length.

Self-reliance is the pilgrim's best staff, the worker's best tool. It is the master key that unlocks all the difficulties of life. Help yourself and Haven will help you' is a maxim that receives daily confirmation. He who begins with crutches will generally end with crutches. Help from within always strengthens, but help from without invariably enfeebles the recipient. It is not in the sheltered garden, but in the rugged Alpine cliff, where the storms beat most violently, that the toughest plants are reared. It is not by the use of corks, bladders and life-buoys that you can best learn to swim, but by plunging courageously into the waves and buffeting them. To wait until some charitable man passes by, to stand with arms folded, sighing for a helping hand, is not the part of any manly mind. The habit of depending upon others should be vigorously resisted, since it tends to weaken the intellectual faculties and paralyse the judgement. The struggle against adverse circumstances has, on the contrary, a bracing and strengthening effect, like that of the pure mountain air on an enfeebled frame. This is a lesson which, now-a-days, is not taught in colleges. To us it seems the vice of modern systems of education that they lay down too many 'royal roads' to knowledge. Those impediments which formerly compelled the student to think and labour for himself are now most carefully removed, and he glides so smoothly along the well-heaten highway that he pauses not to heed the flowers on either side.
