5 Marks

He was a funny-looking man with a high, bald, dome-shaped head, a face very small in comparison, a round upturned nose and a long wavy beard that didn't seem to belong to such a face. His ugliness was a standing joke among his friends and he helped them to enjoy the joke. He was a poor man and something of an idler, a stone- cutter by trade, a sort of semi –skilled sculptor. But he didn't work any more than was necessary to keep his family alive. He preferred to talk and since his wife was a complaining woman who used her tongue like an angry wagon driver using a horse-whip, he loved above all things to be away from home.

He would leave home after a hasty breakfast and be in search of a shop, or a temple, or the public baths, or a street corner, where he could get into an argument. The city he lived in, was Athens and the man we are talking about is Socrates.

One of his friends had asked the oracle at Delphi, who was the wisest man in Athens. To the astonishment of all, the priestess had mentioned this idler Socrates.

"The Oracle", he said, "chose me as the wisest Athenian because I am the only one who knows that he doesn't know anything".

1. A person who avoids work _____(choose a right word from the passage). **(1)**
2. Why did Socrates stay away from home?   **(2)**
3. How did Socrates spend his time?   **(2)**

5) Imagine you are the HR Manager of a firm. You have visited a college for campus interview. Give a brief self- introduction on this occasion and explain the recruitment process.   **(5 Marks)**

6) **Give one word substitutes for the following. Choose the appropriate answers from words given in brackets.**   (1x5=5)

1. To laugh quietly
2. A state of total confusion.
3. Sudden convulsive movement.
4. Something impossible to believe.
5. Think about something deeply at length.
(incredible, mull, chuckle, chaos, bristling, pulsating, spasm, tumble)

2. "The Importance of Being Earnest" is the best example for 'comedy of Manners. Explain.

UNIT - IV

IV A   **Read the following comprehension passage and answer the questions**   **(5x1=5)**

Though much is said about the need to encourage grass roots innovators, the reality is that there are too many hurdles in their path. No one knows this better than Mangal Singh an innovator from Lalitpur District (Bundelkhand Region) of Uttar Pradesh. It was around 1987 that Mangal Singh successfully demonstrated the Mangal Turbine in his native Bhailoni Lodh village. The turbine lifts water from a river without using either diesel or electricity. Senior officials technocrats and researchers showered well deserved praise on the innovation and the innovator.

A study by IIT Delhi and Vigyan Shiksha Kendra found it very useful and cost effective, helpful not only in agriculture but also for small-scale industries. Later other scholars affirmed impressive reduction in greenhouse gas emissions achieved by the Mangal Turbine. Despite obtaining a patent and a bagful of endorsements at a relatively early age, Mangal Singh and his innovation have been victims of apathy and neglect over the last three decades. Although he has worked to spread the word about his innovation, visiting several states, age and discouragement have taken a toll on his health. The government should take immediate steps to give the Mangal Turbine importance in programmes relating to irrigation drinking water and renewable energy. Several lift irrigation projects in the country are non-functional today for a number of reasons. The Mangal Turbine can be used at suitable sites to give a new lease of life to these projects.

1. What did Mangal Singh innovate and where?
2. How does Mangal Singh's innovation work?
3. Name the institutions that lauded Mangal Singh's innovation.
4. What has Mangal Singh faced over the last three decades?
5. What does the government need to do regarding Mangal Singh's innovation?

À Visan, les touristes vont à la ferme

Pas un villageois n'y échappe « La Ferme » de TF1, est aujourd'hui le principal sujet de discussion à Visan (Vaucluse), du salon de coiffure à la boulangerie. C'est dans ce village de 1638 habitants que sont implantés les locaux de la nouvelle émission de téléréalité. Une vingtaine de célébrités sont enfermées dans une ferme pour y travailler.

Au village, il y a les pours et les contres. Mais les enthousiastes sont plus nombreux. Au café le patron allume la télé à l'heure de l'émission : « Les clients la regarde, chacun y va de son commentaire. Souvent les passants nous demande ou est située la ferme. » Des passant parfois envahissants : 400 voitures ont débarqué le lundi de Pâques.

« Je n'avais jamais vu autant de monde à Visan » confie Claude, agriculteur.

Certains bénéficient déjà de retombées économiques, comme Géraldine, la boulangère : « On fournit de 30 à 80 baguettes par jours à la production, c'est rentable » Theo, de la cave de Visan, livre à la ferme entre 50 et 60 bouteilles tous les dix jours : « Nous sommes dans une région viticole. Si seulement 10% des téléspectateurs retiennent que les célébrités boivent du vin de chez nous, on aura réussi.»

D'autres sont plus critiques. Raphael, aide-soignant, espérait « que 'La Ferme' donnerait une meilleure image de Visan. Mais les journalistes nous snobent et nous étiquettent ' paysans '. Vivement que tout soit fini, que le village redevienne ce qu'il était. » Il ne reste donc plus qu'à attendre. Attendre de retrouver la tranquillité pour certains, attendre les retombées financière pour d'autres.

20 minutes, jeudi 29 avril 2004

1. Ce texte vient de quel journal ?
2. Combien d'habitants y-a-t-il dans le village ?
3. Quelle type d'émission est « La Ferme » ?
4. Quelle est la profession de Claude ?
5. Pourquoi Raphael n'aime pas « La Ferme » ?
6. Quelle est la retombée économique pour Géraldine ?
7. Les habitants de Visan, sont-ils tous contents de la présence de TF1 ?
8. Pourquoi les touristes vont à la ferme ?
9. Theo, qu'est-ce qu'il livre a la ferme ?
10. Nommez la/les émission(s) de téléréalité que vous avez vu.

IX. **Ecrivez deux dialogues :**   (20)

1. Votre ami(e) a un entretien pour trouver du travail. Vous lui donnez des conseils.
2. Vous êtes invité dans votre famille avec votre ami(e). Mais votre ami(e) hésite à venir parce qu'il/elle ne connait personne dans votre famille.
3. Vous retrouvez un(e) ami(e) que vous n'avez pas vu(e) depuis longtemps. Imaginez la scène.

X. **Ecrivez deux lettres :**   (20)

1. Vous écrivez à votre ami(e). Vous lui décrivez vos vacances d'été.
2. Vous avez envie de faire un stage dans une entreprise française (lettre ou message au DRH : directeur des ressources humaines).
3. Vous avez participé dans une fête. Vous écrivez à votre ami(e). Vous lui décrivez la fête (de votre pays ou d'un pays que vous connaissez)

20 One important change that has affected family life in India, as the break up of the joint family system. In the new family pattern, both parents work and go their way and children go their own way. Working parents Often have very little time to spend as a family and the adolescents pulsating with new energy and full of new experiences and questions, begin to get estranged from their part time parents. They then turn to peers and media for their role models. We see the power of peers and media increase as the family influences decrease.

1. For last year a Company had budgeted to absorb overheads at the rate of $5 per direct labour hour and it was estimated that each unit would require 4 direct labour hours. Production was budgeted at a level of 2,000 units but actual production was 1,900. It transpired the actual overheads incurred were $43,000.

   What was the under/ over- absorption of overheads for the year?

   a. $2,000 over – absorbed

   b. $2,000 under- absorbed

   c. $5000 over – absorbed

   d. $5,000 under- absorbed

2. A company operates a premium bonus system by which employees receive a bonus of 75% of the time saved compared with a standard time allowance (at the normal hourly rate).

   Details relating to employee X are shown below:

   Actual hours worked :   36 hours

   Hourly rate of pay : $10

   Output achieved 400 units of product Y

   Standard time allowed (per unit of Y) 6 minutes

   What is the bonus payable to employee X (to the nearest $)?

   A. 30

   B. 40

   C. 70

   D. 80

3. A product requires raw material costing $0.5 per kg. In February 2,500 kg of raw material were purchased at a cost $ 1,500. 2,300 kg of raw material were used. Raw material inventory is valued at standard cost and there was no opening inventory of raw material.

What was the materials price variance for February?

A. $250 adverse

B. $230 adverse

C. $230 favourable

D. $250 favourable

4. An investment of $ 100,000 to be made on 31 December 2017 will production return of $ 13,000 in perpetuity, with the first occurring on 1 January 2018.

What is the net present value of this investment (to the nearest $10) on 31 December 2016,

A. $ 11,820

B. $25,450

C. $39,090

D. $79,090

5. The following information is available for a production process for the last period:

Material input 200kg at $6 per kg

Labour and overhead input $3,500

Transfer to finished goods 190 kg

Normal loss is 15% of input and has a scrap value of $ 1 per kg

There is no opening or closing work in progress.

What is the value of the finished output for the period (to the interest $)?

A. $4,465

B. $4,670

C. $5,219

D. $5,253

6. Selected figures from a firm's budget for next month are as follows.

Sales $4,50,000

Gross Profit on sales 30%

Decrease in trade payables over the month $10,000

Increase in cost of inventory held over the month $18,000

What is the budgeted payment to trade payables?

A. $343,000

B. $323,000

C. $307,000

D. $287,000

7. Which of the following is correct?

A. Qualitative data is generally non-numerical information.

B. Information can only be extracted from external sources.

C. Operational information gives details of long term plans only.

D. Quantitative data is always accurate

SECTION – B

Answer any FOUR questions carrying 12 marks each. **(4x12=48)**

8. Tomkins is engaged in the production of electronic musical instruments. The Management accountant wishes to prepare a flexible budget for next. He obtains the following information from a summary of electricity cost as related to direct labour hours for the current year:

Month	Electricity cost ($)	Direct labour hours
May	1,548	297
June	1,667	350
July	1,405	241
August	1,534	280
September	1,600	274
October	1,600	266
November	1,613	285
December	1,635	301

Required:

Using regression analysis $y=a+bx$ of the above data, estimate:

a. the annual fixed element of electricity cost.

b. the variable element per hour of direct labour.

9. Omega Electronics has the following budgeted statement of profit or loss:

	January $000	February $000	March $000	April $000
Sales	40	45	50	55
Cost of sales	(20)	(22.5)	(25)	(27.5)
Gross profit	20	22.5	25	27.5
Salaries and wages	(10)	(10)	(10)	(10)
Other administrative costs	(5)	(5)	(5)	(5)
Depreciation	(7.5)	(7.5)	(7.5)	(7.5)
Profit	(2.5)	0	2.5	5

The following assumptions have been made relating to cash flows.

1. Half of the customer will pay in the month following the month of sale and the Other half will pay two months after the month of sale. In each of November and December, sales revenue was $75,000.

2. At the start of each month there will be sufficient inventory to meet 50% of that month's cost of sales. At the end of April, closing inventory will be $ 15,000.

3. Purchases will be paid for one month after they are made. Purchases in December were $27,500.

4. All salaries and wages and other administrative costs are paid in cash in the month in which they arise.

5. There will be no investments during the period.

Required:

Prepare the cash budget for the months of January to April. It is expected that the cash balance on 1st January will be $5,000.

10. Annual demand = 800,000 units

Fixed costs of placing an order = $1,200

Holding costs = 10% of the price paid

Price (before discounts) = $100

The supplier is offering discounts based on order quantities.

The discounts are as follows:

0-4,999 units	0%
5,000-24,999 units	2%
Above 25,000 units	3%

Required:

Determine the optimal order quantity.

11. A company produces a single product with the flowing budget.

Selling price	$10
Direct material	$3/unit
Direct wages	$2/unit
Variable production overhead	$1/unit
Fixed production overhead	$10,000/month
Budgeted production	5000units/ month

Required:

Show profit calculation for the month when 4800 units were produced and sold using

   a. Marginal Costing

   b. Absorption costing

Assume that all cost were a budget.

12. (a) What do you mean by Activity based Costing/ List out its Advantages. **(6 marks)**

Answer any **TWO** of the following.

14. A firm has two production and two service departments. It makes two products and its total overhead for the year as follows:

	$
Rent	20,000
Depreciation	
Machinery	10,000
Building	8,000
Electricity	5,000
Indirect materials	15,000
Repairs and maintenance	1,000
Lighting	1,000
	60,000

The following statistics are available:

	Pressing	Assembly	Canteen	Maintenance
Area	2,500	5,000	1,000	1,500
Machine value ($)	1,000	5,000	1,000	3,000
KW hour rating of machine	10,000	10,000	2,500	2,500
Indirect material consumed	5,000	5,000	3,700	1,300
No. of points	30	40	20	10

Use of service department costs is estimated as:

Use of canteen	50%	40%	___	10%
Use of maintenance	50%	40%	10%	___

Required:

a) Allocate and primary apportion overheads to cost centre

b) Reapportionment using simultaneous equation

15. William manufactures exclusive office equipment and is attempting to prepare a budget for March. The following information is relevant:

	Opening inventory in units	Budgeted sales in units March	Selling Price
Hogmonay	73	390	220
Melchitt	46	220	308
George	100	330	61

Annie requires that her closing inventory be 30% of that month's sales.

All three products are made using material Y, material Z, unskilled labour, skilled labour and other overheads. The Quantities are as follows:

	Material Y Labour	Material Z	Unskilled labour hr	Skilled hr
Hogmonay	4	2	3	2
Melchitt	5	3	5	8
George	2	1	2	___
Cost	$12	$7	$4	$6

57

Annie opening inventory of raw materials is 142 cubic meters of wood and 81 cubic meters of plastic. She intends to increase this during March, However, so that she always has sufficient raw materials to produce 50 units of each item of equipment. Other overheads are recovered on the basis of $1 per labour hour.

Required:
 a) Prepare functional budgets for March for:

   i)   Sales

   ii)   Production

   iii) Materials usage

   iv)   Labour usage

   v)   Materials purchases

 b) Prepare a budgeted profit and loss account down to gross for the month ending 31 March.

16. The Elvira is contemplating three available investment opportunities, the cash flows of which are given below:
